

ABHISHEK SINGH

Cloud Engineer | DevOps Engineer

Ghaziabad, Uttar Pradesh, India • +91 9935953563 • 7080dhiru@gmail.com

Portfolio: 7080dhiru-star.github.io/cloud-engineer-portfolio • LinkedIn: linkedin.com/in/abhishek-singh-4489ab265 • GitHub: github.com/7080dhiru-star

PROFESSIONAL SUMMARY

Results-driven **Cloud Engineer** with hands-on production experience managing multi-cloud environments (**AWS, GCP**), **VMware ESXi virtualization**, Linux administration, and enterprise datacenter operations. Proven track record of sustaining **99.9% uptime SLAs**, optimizing cloud resource expenditures, executing disaster recovery protocols, and accelerating CI/CD deployment cycles by **20%** through automated provisioning workflows. Certified in **Oracle Cloud Infrastructure (2025 Architect Associate)** and **Fortinet Cybersecurity**.

TECHNICAL SKILLS

Cloud Platforms: Amazon Web Services (AWS - EC2, S3, VPC, IAM, RDS), Google Cloud Platform (GCP), AlloyDB, Private Cloud
Virtualization & Hypervisors: VMware ESXi, Hypervisor Management, Virtual Machine Provisioning, Capacity Planning, VM Snapshots, Datastores
Operating Systems & Admin: Ubuntu Linux, Linux Server Administration, Windows Server 2016/2019/2022, Plesk Control Panel
Datacenter & Hardware: Datacenter Operations, Server Deployment, RAID Configuration, Hardware Maintenance, Rack Installation, Network Cabling
Networking & Protocols: DNS, DHCP, VPN, TCP/IP, Firewall Policy Configuration, Network Troubleshooting, Secure Tunneling
Cloud Operations & SRE: 99.9% Uptime SLA Management, Proactive Monitoring, Incident Response, Disaster Recovery (DR), Backup Management, Cost Optimization
Security & IAM: Cloud Security Best Practices, Infrastructure Hardening, IAM Access Controls, Cybersecurity Frameworks
DevOps & Scripting: CI/CD Pipelines, Infrastructure Automation, Python, Java, SQL, C, Shell Scripting Basics

PROFESSIONAL EXPERIENCE

PURVACO TECHNOLOGY PVT. LTD.

Cloud Engineer

Ghaziabad, India

September 2025 – Present

- Architect and maintain multi-cloud production workloads across **AWS (EC2, S3, VPC, RDS, IAM)** and **GCP**, consistently achieving a **99.9% uptime SLA** across client-facing applications.
- Administer enterprise **VMware ESXi** virtualization infrastructure, managing hypervisors, capacity planning, VM provisioning, and datastore allocation.
- Automate and standardize **CI/CD deployment pipelines** in collaboration with software development teams, cutting application deployment turnaround time by **20%**.
- Perform end-to-end **Ubuntu Linux** and **Windows Server** (2016/2019/2022) administration, including patch management, access control enforcement, and kernel/service troubleshooting.
- Enforce infrastructure security hardening, least-privilege IAM policies, and strict firewall configurations across VPN, DNS, DHCP, and TCP/IP network interfaces.
- Drive cloud cost optimization by monitoring infrastructure resource utilization, eliminating idle instances, and rightsizing compute/storage workloads.
- Manage web hosting and server administration via **Plesk**, ensuring continuous operational availability for production web applications.
- Execute enterprise datacenter operations, including server deployments, hardware rack installations, network cabling, and **RAID array configurations**.
- Formulate and test **disaster recovery (DR)** strategies and automated backup procedures to safeguard business-critical data and infrastructure continuity.

TECHNICAL PROJECTS & INNOVATION

Women Safety Analytics — AI & Threat Detection Platform

Python, Machine Learning, Pandas, Scikit-learn, Anomaly Detection

- Engineered a real-time safety analytics platform using anomaly detection and classification models to identify irregular threat signals and provide actionable public safety telemetry.
- Implemented data preprocessing, feature extraction, and model optimization pipelines using Python and Scikit-learn to maximize classification accuracy.
- Collaborated with **Madadgar Foundation** to deploy 5+ functional social-impact software prototypes solving real-world safety challenges.
- Recognized with innovation awards at **Smart India Hackathon (SIH)** and **Hackwith Uttarakhand** for technical architecture and practical execution.

CERTIFICATIONS

• Oracle Cloud Infrastructure 2025 Certified Architect Associate — Oracle	2025
• Fortinet Certified Associate in Cybersecurity (Credential ID: 5144971646AS) — Fortinet	2025
• Google Cybersecurity Certificate — Google	2025
• AlloyDB Resource Management — Google Cloud (GCP)	2025
• Open Source LLM Chatbot Development — Technical Specialization	2025

EDUCATION

Bachelor of Technology in Computer Science and Engineering — Nitra Technical Campus, Ghaziabad, UP

2022 – 2026
